# Turtle Number Bonds

Goal: To make ten by putting shapes on each side of the turtle.

You will need: Turtle and shapes

What to do: Cut out the ten shapes and place them in two groups, one on each side of the turtle.

Find out:

- How many combinations of two groups of shapes make ten?
- What happens if you switch the groups of shapes; do you still have ten shapes all together?
- What happens if you put all the shapes on one side?

Shapes for the turtle
