

Snack Time for Frog

Goal: To count frog's snacks and to feed frog the right number of snacks

You will need:

- Pictures of frog snacks
- A picture of frog
- Tape

What to do:

- Put a picture of frog on a surface that your child can reach easily.
- Tell your child how many snacks to feed frog. This might sound like, "Give frog three flies to eat." or "Feed frog two fleas." Count frog's snacks together aloud, "One fly, Two flies, Three flies."
- Place or tape the frog snacks on frog's belly.
- Keep feeding frog.
- Encourage your child to tell you how many snacks you should give frog to eat. As you place or type them on frog, count them together too.

Other options:

- Place a picture of frog's face on a container. Decide how many snacks to feed frog and place them inside the container.
- Make a felt frog and attach different felt foods to frog.
